
SmartagriHubs Webinar “Innovation Farm - Farming for Future”

Join the webinar and get more information about what is going on so far in this innovative project!

Founded in 2020, **Innovation Farm** has already become one of most popular digital farming hubs in Central Europe. Based on three main locations in addition to dozens of regularly operating farms Innovation Farm cooperate with research organizations, machinery producers, software appliers, cooperatives, farmers organizations and advisory services.

Overall goal is to test new technologies in plant and livestock production, validate results and disseminate knowledge to entrepreneurs and farmers.

When: 21st May 2021, 11-12 am

Where: online via zoom (you will get the link a few days before the webinar starts)
